

Your Cue for Getting Rid of Your Queue

Mobile & Interim Imaging Solutions
from DMS Health Technologies

Tackle Patient Backlog Head-On

DMS understands the signs of an overbooked diagnostic imaging operation: edgy patients, stressed out staff members, a waiting room constantly filled to capacity, physicians sending patients elsewhere.

DMS understands these challenges. We provide the mobile and interim diagnostic imaging technologies, staff and services your facility needs, when and where you need them. You'll be able to:

Manage your current volume and build more *all without hiring new staff or buying new equipment.*

Expand your services *by offering the technologies on a more frequent and flexible schedule to meet changing patient demands.*

Offer these additional services *one day a week, two days a week, etc... whatever suits your situation.*

Keep your patients where you want them – *in your facility.*

**We can help make your queue manageable again.
Contact us today.**
