

**The Bigger They Are,  
The Higher They Fly**

It takes  
heavy-duty  
cranes to fly today's  
towers and turbines.  
Wanzek has them.

With our new Demag cranes, Wanzek is a BOP constructor that can erect any wind tower and any turbine anywhere in North America. The CC2500-1 is a 500-ton crane and our CC2800-1 NT goes 600. And with 507 MW of wind construction to our name, Wanzek has all the expertise you need for part or all of your project.

Get responsive constructors on your project.
